

## Joint Supervision at Tsukuba University

Ezzah Atikah Binti Marsid, MJIIT, Universiti Teknologi Malaysia

### EZZAH ATIKAH BINTI MARSID (22/7/2014 – 17/1/2015)

Konnichiwa and moshi-moshi everyone! Nice to meet you in autumn. I'm Ezzah Atikah Binti Marsid a master postgrad student from MJIIT UTM International Campus, Kuala Lumpur. I'm under Associate Professor Dr. Hirofumi Hara's supervision along with my friends, Atiqqoh Binti Apani, NorFarhana Binti Mohd. Barnoh and Nurul Syahirah Binti Shamsol Anuar we came to the Land of the Rising Sun. I am really glad because by given a 6 months chance of joint supervision in Tsukuba University I get to work with a renowned professor and entered one of the best universities in Tokyo. Here, we carry out our experiment in Utsumi sensei's laboratory (Laboratory of Aquatic Science) which is located on the sixth floor of the Laboratory of Advanced Research A Building, Tsukuba University. The laboratory is more related to the environment where some of the students focusing on microorganisms experimental researches which can treat environment while the rest of them focusing more on water quality.

Fortunately, our researches are related to this laboratory and thus Utsumi sensei and our new friends really help us a lot in carrying out our experiment. Besides, teaching me how to handle the experiments in the laboratory and at the same time I learn a lot about safety and health precautions from them. It is such a new experience and fun conducting experiment in this new environment. Later on I shall share many of my new experiences. Until we meet again in the next article. Bye.
