University of Tsukuba emergency preparedness drill (Nurul Syahirah Binti Shamsol Anuar)

Minna-san konnichiwa!. I am Nurul Syahirah. This week on 19 November 2014, an emergency preparedness drill was conducted by the University of Tsukuba. It was held on the assumption that an earthquake intensity 6 lower happened during daytime on a weekday. The objectives were to familiarize individuals with emergency procedure, strengthen cooperation system among organizations concerned and raise public awareness of disaster prevention. All of the student and staff were gathered at the designated evacuation sites and asked to report their safety status to the university. We were excited because this is the first time we were involved in the event like this. That's all for this week article. Till we meet again in the next article. Sayonara.

Left: Move to evacuation site.

Right: Our lab members.
