

## Joint Supervision Programme

Yus Amira binti Yusaimi, MJIIT, Universiti Teknologi Malaysia (9 Jan – 18 July)

### First Experience

I feel amazed, at 7.15 am once MH88 touched down at Narita Airport, Tokyo on 9<sup>th</sup> January 2015, as we were welcomed by beautiful scenery and unexpected weather that we never experienced before. The temperature at that time was about 1°C.

Around 9 am on the arrival day, my research partners, Nurtasbiyah, Aeyshah and I took a local bus to Tsukuba Centre and we finally arrived at University of Tsukuba before noon. In Tsukuba University, we were greeted by three Japanese students, Azusa Hashimoto, Seiya Takahashi and Syunichi Ohyama which also assigned as our tutors. Then, they helped us to settle our accommodation and all other important things for our 6 months staying in Japan. Besides that, I was glad that I get to meet with our lab-mates, Farhana, Syahirah, Ezzah and Atiqqoh whom already completed their 6 months research here.

Above all, I really thanked God that I was given this opportunity to experience studying abroad since this is my dream ever since I joined MJIIT.

Pic.1 Arrival; Japan welcome us...what a relief, on the way to Tsukuba Centre.
