Join Supervision Programme

Mohd Danial bin Muhd Ali, Malaysia - Japan International Institute of Technology (MJIIT)

See you again, *Sayonara*! (Mohd Danial Muhd Ali, March – August, 2015)

Minna-san, Konnichiwa, Assalamualaikum w.b.t

Where is the good in saying goodbye?. Still, life must keep on moving. Officially, on 28 August 2015, is my last day in University of Tsukuba, Japan. Too much experiences and memories to share, yet it is not enough to write in only one page article. I learned so many thing within 6 months living by myself here. The most important thing is I am very much indebted to my family, because of their support and blessing, I could be here.

I am taking this opportunity to acknowledge the people that has given me support and guidance during this program. Firstly, I would like to express my sincere gratitude to my advisor in University of Tsukuba, Prof Dr Zhang Zhen Ya for the continuous support of the exchange program and related research and gave me access to the laboratory and research facilities. Besides that, my sincere thanks to my main supervisor, Dr Pramila Tamunaidu (MJIIT) for her good words and motivation in my research and not to forget, Prof Dr Norio Sugiura for his recommendation and support for this program. Big thanks to Japan Student Services Organization (JASSO) as my financial support for this program

I also thank my fellow labmates for the stimulating discussions and knowledge to me during my research work in laboratory, especially Hongyi Sun, Cai Wei, Huang Wei Wei, Yuan Tian, Li Junjun, Wang Xiaoxin, Nozawa Daisaku and others. Thank you so much friends. My last trip while still in Japan was to Tokyo Disney Sea located in Urayasu, Chiba-Ken with my friends. I found the park was full of magical new experiences, since this is my first time visiting Disney's theme park. We spent one very-full day at Tokyo Disney Sea and bought some *omiyage* (souvenir) there.   Bye-bye.
